Memorandum of history rec. from  
Dr Lamb, Sept. 12, 1876.  
Rec. & ack. May 26. 1876.

Union  
"Webb Terbee, a native of N.Y., about 13 - had suf-  
fered with cystitis and other symptoms of stone  
"for two or more years; had never been  
"sounded previous to operation performed  
"Nov 17<sup>th</sup>, 1875: Lateral method; present-  
"ed no special difficulties; Urine  
"passed on the 10<sup>th</sup> day and recovery  
"complete, with a gain of 25 pounds  
"weight, at end of one month.  
"Stone weighed within a fraction of  
"14 drachms."

Case Webb Terbee - Successful.

Calcutti Case

Recd May 29, '76.  
Ack. June 2, 1876

Calculus removed from Bladder by the  
lateral operation. "Had trouble about  
the bladder for several years which  
had recently increased of late; Great pain  
and difficulty in micturition; had never  
passed blood; Sound passed Jan 19, '76.  
and stone detected; Operation performed  
Jan 20; lateral method; no difficulty  
encountered. On second day after  
operation urine ceased to flow from  
wound and he regained entire con-  
trol of bladder - only a small portion  
escaping through the wound in micturi-  
tion. On consequence the wound healed very quickly  
and on the 10<sup>th</sup> day he was out of bed.

Presented by Dr. George A.  
Mursick, of Kyack, Md.

6659

Received Oct. 5<sup>th</sup>, 1876.

Left hand amputated from a man named Smithough, aged 44. When a child the hand was badly burned & distorted by hot ashes. While running idly from 4 to 8 years ago - a sore formed upon the cicatrix - he thought it caused by the jarring of the drill. In the interregnum of service of Dr. Elmy & myself here, about Oct., 1874, Lieut. Surg. O'Callahan amputated three fingers. The wound never healed entirely - but nearly always painful & useless. About one year ago the old & new cicatrices broke down with the development of a profuse warty growth, with great & continued pain. When he reported to me a few weeks ago the hand was covered with a sensitive, condylomatous, cauliflower growth, very vascular. In my ignorance, I could and can only term it malignant (a la crass) - Treatment failed. I send you the specimen amputated between the old and new cicatrices 13 days ago - stump looks well - Operation by the Contributor.

Case of Pot. Geo. Goodrich, Co. C, 24<sup>th</sup>

Inf. ~~This spec. was destroyed while  
making a microscopical examination  
Jan'y, 1892.~~

Rec. & ack. Apl. 1, 1879.

A small toy whistle, swallow-  
ed by a healthy boy six years  
old, Jan'y 9<sup>th</sup>, 1877, in the fore-  
noon; voided by stool, about  
the same hour of day Jan'y 9<sup>th</sup>  
1877, under influence of mild  
laxative (oil and Rochelle Salts)  
No bad symptoms.

109

Presented by J. J. Wood-  
ward, Surgeon, U.S.A.

Received Jan'y 9<sup>th</sup> 77.

Cancer of the left breast of two years  
growth; removed, post mortem, by  
Dr. D. S. Lamb, Dec. 22<sup>d</sup>, 1876.  
Had had double inguinal hernia  
for 10 years.

Case of Mrs. J. L. Fisk, of Minne-  
sota, aged 45 years.

Memoranda of case on file.

71-4

Presented by L. E. Rastetterberg,  
M.D., Washington, D.C.  
Microscopical Section.

Received and acknowl-  
edged Jan'y, 16<sup>th</sup>, 1877.

Atrophy and ankylosis of the lum-  
ber vertebrae of (melanogramme aeg-  
lifinus, Linne) Haddock.

Sub-Section  
II

6724

Presented by E. F. Schaffheit.

Received and Catalogued  
Jan'y, 16<sup>th</sup>, 1877.

Complete extrusion of the spleen,  
from incised wound, with ligation  
and removal of the same.  
Recovery.

6720

Presented by J. D. Mc Combs,  
M.D., Charlotte, N.C.

Personally acknowledged  
by Dr. Otis.

Case of Wallace Fox, Colored, aged  
22, { Wounded with a pocket-knife in a fight  
at Camp-Meetings (History on file)

Received Dec. 23<sup>d</sup>, 1876.  
9<sup>th</sup>, 1877.  
Catalogued and Acknowledged Jan'y.

Upper two-thirds of left femur  
removed post-mortem.

Formerly A.M.M., 2652.

6721

Discarded April 1, 1879, by  
order of Dr. Otis, being  
worthless as a surgical spec.

Reclaimed

Found in Store room, identified  
and Catalogued Jan'y. 9<sup>th</sup> 77

Case of Squire Bartlett, Co. 11, 9th Cav.  
Wounded Sept 24, 1877 - died at 8.30  
p.m., on the 26th September, 1877.  
Autopsy 13 hours after death.

7-8

Received & acknowledged April 4, 1878.

Tumor, removed from right  
axillary region Aug. 1, 1877,  
at Fort Bayard, New Mexico.

Died Oct. 29, 1877.

Medical Section Nos 1405 and 1406.

Case of John Gillen, 1st Co. E. 15th Inf.  
aged 35 years.

6821

Presented by Asst. Surg.  
Robert E. Smith, U.S.A.

Six other specimens from Gillen &  
prostate gland & bladder of a dog  
were received at same time and  
turned over to Dr. Woodward.

Received & acknowledged  
April 4, 1878.

70 - 1

Portion of first rib of left side, showing  
neoplasm on anterior surface involving  
osseous structure

IV C. 9  
6822

Presented by Asst. Surg. R. E. Smith,  
U.S.A.

Six other specimens from Gillen - and  
prostate gland & bladder of a dog  
were received at same time and  
turned over to Dr. Woodward.

Case of John Gillen, 1st Co. E. 15th Inf.  
aged 35 years.

Died Oct. 29, 1877.

Received & acknowledged April 4, 1878.

Two vesical calculi, successfully  
removed by the left lateral operation  
of lithotomy, Dec. 15, 1877. Mamma  
healed kindly.

6823

Presented by Prof. A. Ashford

Case of Mr. D., aged 61 years,  
of Ohio

History Received & acknowledged May 7, 1878.  
Received & acknowledged April 5, 1878.

Plaster cast of a case of atrophy  
of the bladder from an adult  
female. Presented through Dr. Otis  
to the Army Med. Museum Dec. 24,  
1878. It was mounted by Mr. E.

6824

Presented by Dr. Christopher Johnston  
of Baltimore, Md.

Two photographs sent to  
donor and memorandum of case  
acknowledged April 18, 1878.

Schaphirin and the mal formed part  
colored after a colored lithograph  
by Trelike.

Catalogued & acknowledged Apr. 5, 1878.

Two exfoliated fragments of the os frontis. The largest removed nearly eight and the smaller nearly nine weeks after gunshot injury of the head.

I. A. C. d. 4. Presented by Geo. M. Kober, Acting Asst. Surgeon

6825

Case of Corporal William Mulcahy, Co. H. 4th U.S. Artillery. Wounded by 400 Paces Indians at Kaniab S. T., July 13, 1877. Returned to duty September 24, 1877.

Received by Mail & acknowledged April 11, 1878.

6829

Presented by Asst. Surgeon M. E. Taylor, U.S.A.

Case of Albert H. - an American, aet. 16.

Received April 23, 1878.

71-2

Acknowledged April 26, 1878.

Knuckle of the jejunum, showing rupture, by a fall from a horse.	✓ L	Presented by Asst. Surgeon L. S. Tesson, U.S. Army.
Case of Henry D. Haws, Co. C, 2d Canalry. Died 22 hours after reception of injury.	6830 XX 65 - 6	Received April 23, 1878. Acknowledged April 26, 1878.
Right foot amputated for Myce- toma, or East India fungus.	Wet ✓ 6831 XVII 71 - 4	Presented by Asst. Surgeon Benjamin F. Pope, U.S.A.  Two Medical specimens were received in the same box and turned over to Dr. Woodward.  Received & acknowledged April 24, 1878.
Segment of Frontal & right parietal bones, showing shot perforation of the frontal, with I. A. B. F. 81 fractures extending nearly to the occiput	✓ 6832	Presented by Dr. J. O. Stanton, Washington, D.C.  History of this case received from Dr. Stanton Oct. 12, 1878, and acknowledged the same day.
Case of Schorne, who committed suicide at the Imperial Hotel, Washington, D.C., Dec. 29, 1878.	X	Catalogued April 24, 1878.
Brain, belonging to specimen 6832.	Wet I. A. B. F. 31. 6833 T 6 - 8	Presented by Dr. J. O. Stanton, Washington, D.C.  Catalogued April 24, 1878.
Tumor, removed from the breast by the donor; first observed about 3 <sup>or</sup> 4 years ago — increased rapidly <del>in</del> after a hurt last summer.	Wet ✓ 6834 XXIV	Presented by Dr. C. S. Lincoln.
Case of Mary Meram, of Laurel, Va. Oct. 29.	71 - 4	Received & acknowledged Apr. 25, 1878.

Upper portion of left humerus. Sternum and ribs, showing sternal fracture.	IV. Sect. I. 6	Presented by St. A. Surgeon J. H. Atkins.
	6835	Received in box with 6834 + 6838 and other comparative anatomy specimens, and 913 - Sect. II.
Case of Gibbs, a negro servant, about 24 years old.	C	Received May 11, 1878. & acknowledged May 17, 1878
Heart, showing gunshot wound of pulmonary artery	XVIII. I. A. A. 16.	Presented by St. A. Surg. J. H. Atkins.
	L	Received in box with 6834 + 6838 and other comparative anatomy specimens, and 913 - Sect. VI.
Case of Gibbs, a negro servant about 24 years old.	6836 XVIII. II A. A.	Received May 11, 1878, and acknow- ledged May 17, 1878.
Right foot & leg of a Deer, showing an osseous tumor on ulna and radius.	Sub. Sect. II.	Presented by St. A. Surgeon J. E. Wilcox, U.S.A.
	6837	Received in box with 6835 + 6836 and other comparative anatomy specimens and 913 - Sect. VI.
On dissection it proved to be a compound fracture of ulna and radius with extensive callus uniting the fractures.	C	Recd. May 11, 1878, & acknow- ledged May 17, 1878.
Right fore leg & foot of a Deer, showing a horse shoe nail in outer hoof	Sub. Sect. II.	Presented by St. A. Surgeon J. E. Wilcox, U.S.A.
	6838	Received in box with 6835 + 6836 and other comparative anatomy specimens, and 913 - Sect. VI.
		Recd. May 11, 1878, and acknowledged May 17, 1878.
Vertical Calculus, removed from the urethra of a woman by the doctor.	XX	Presented by Louis Mackall, Jr. M.D., through Dr. Lamb.
	6839	Received May 13, 1878, & acknow- ledged May 17, 1878.
Weight, 4.719 grains.		

The right femur, showing gunshot fracture — Small piece of lead is lodged in the bone — fragments of the bone are missing. History unknown. Received in a box with anatomical spec's. 1849 to 1856. It is numbered 8 on the list.

XIII. A.A.B. 16

6840

Presented by Hospital Steward Samuel W. Richardson, U.S.A.

Received May 23, 1878.  
Acknowledged May 25, 1878.

Skeleton (imperfect) of an adult female from near Old Red Cloud Agency, and is probably an Ogallalla Sioux. The atlas is firmly ankylosed to the occiput; and two of the lumbar vertebrae the spinous processes are

separated

This spec. is also numbered 1854 in Sec. IX. A.M.M.

\*  
6841

Presented by Asst Surg. Edward B. Mosley, U.S.A.

Received May 23, 1878.  
Ack. May 25, 1878.

Portions of tibia & fibula and right foot, showing compound comminuted fracture of ankle joint caused by being thrown from the top of a stage; the stage upsetting. Amputated  $3\frac{1}{2}$  inches above ankle, Jan'y 22, 1878, 7 hours after injury. Case of 1st Lt. E. O. Gibson, 10th U.S. Inf. act 38.

XIV. B.A. 17

6842

Presented by Asst. Surg. P. Middleton, U.S.A.

Received & acknowledged May 29, 1878.

Right hand, showing shot fracture of wrist joint. ~~sent~~ received Dec. 10, 1877. Amp. Jan'y 15, 1878, (circular method)  $3\frac{1}{2}$  inches above joint. Esmarch's Bandage applied. Returned to duty Mch. 18, 1878. Case of 1st Sgt. Wm Turner, Co. G. 10th Cav. act. 30 years.

IX. A.B. f. 100
